

8877 的 D:S 比是多少？

回答：

为了达到 ± 0.5 F (± 0.3 °C) 的精度，我们没有描述 D:S 配给是型号 #8877。相反，我们建议距离测量表面尽可能近，例如 1 英寸 (3cm) 和不超过 4 英寸 (15cm) 的距离。谢谢。

Q:

What is the D: S ratio of model 8877 IR thermometer

Answer:

To reach ± 0.5 F (± 0.3 °C) accuracy, we don't describe D:S ration is model #8877. Instead, we suggest the distance is as close as possible from the measuring surface, such as 1 inch (3cm) and no more than 4 inch (15cm) distance. Thank you
