

为什么 88182-88181 的保质期只有 1 年？

请参考 # 88182/88181 的电池保质期，如同您知道仪器上安装的任何电池都会随着时间自行放电。

对于我们在 88182 上使用的电池，它是 Sony CR2032 电池，并且供货商承诺 2 年的使用寿命，因此，它可能可以使用更长，但无法保证。

考虑到我们和您的库存储存时间，我们将电池寿命缩短至 1 年，这意味着我们希望客户在购买记录器以供参考后的一年内可以启动并完成记录。

Question

Why 88182-88181 shelf life only 1 year?

Reply:

Refer to the battery shelf life for #88182/88181, as you know that any battery which installed on the instrument will self discharge by time.

For the battery we use on 88182, it is Sony CR2032 battery and 2 years lifetime promise from vendor, so, it means it can be longer but no promise.

By considering our and your inventory storage time, we shorten the battery life time to 1 year and it means we hope customer can activate and finish the logging within one year after they purchase the logger for your reference.
