

为什么报告显示全部为 70 摄氏度？

所有 70 度 C 均表示错误代码，而不是实际测量值。

请协助提供有关运行环境的更多详细信息以及测试报告，以进一步解决问题，谢谢。

Question

Why the report shows all 70 degree C ?

Reply:

All 70 degree C means an error code, not the real measurement. Please help to provide more detail information about the operating environment with test report for further problem shooting.
